

121 RESEARCH DRIVE INNOVATION PLACE UNIVERSITY OF SASKATCHEWAN SASKATOON, SK

1 21 Research Drive is a LEED Gold office tower at Innovation Place, Saskatoon. With 150,694 square feet over six levels, it is among the scant 1% of surveyed Canadian buildings to achieve the highest environmental standards rating (Level 4) from the Building Owners and Managers Association (BOMA).

The exterior finish is complimented with aluminum composite panel accent bands, and architectural insulated wall panels at the mechanical penthouse. A circular tower structure highlights the northwest corner of the building and extends from the second floor to approximately 32 feet above the roof deck.
