

BAYWATCH HOTEL NORTH MYRTLE BEACH, SC

Once you've got a winning fenestration formula, you tend to stick with it," says David Monday, Pegram Associates' Baywatch Hotel project manager. "We've had great success with the quality extruded aluminum framing systems from YKK Metals," he notes, "and coupled with the high thermal and acoustical performing insulating glass from Coastal Glass, it just makes for a perfect package."

"We also understand from job-site reports that Coastal's rapid response and always on-time deliveries make for a smooth commercial glass installation at a critical point in the building's new life."

TECHNICAL DETAILS OF THE PROJECT

THE CLIENT

Baywatch Hotel

THE PROJECT

**Constructed 2000-2003
Building Size: Three phases - 600,000 sq.ft.**
