

WAGRAM HOTEL PARIS, FRANCE

The Wagram Hotel façade is divided into three glass parts that differ in structure. These are the restaurant, the showcase, and a main façade that hangs in the front of the hotel rooms.

The first two structures run in a straight line and are very transparent. This is achieved by utilizing large glass panels of about 6.5 x 15 feet in the restaurant façade and Super Spacer® TriSeal™ with silicone sealant. The entire project uses about 5,380 square feet of glass.

TECHNICAL DETAILS OF THE PROJECT

THE CLIENT

Hotel Wagram - Paris, France

THE PROJECT

Paris hotel with a bent glass wavy façade

PRIMARY ARCHITECTURAL FIRM

Atelier Christian de Portzamparc

ARCHITECT

Christian de Portzamparc
